

AUSTRALIA TO SWITZERLAND ON A BIKE

MEDIA RELEASE Malaysia and Singapore

September 2006

It started with an idea, turned into a dream and now it's become reality.

Throw together two guys who share a love of nature and sense of adventure, are best mates and only a little bit crazy and you get a bicycle trip of a lifetime - Australia to Switzerland on two wheels!

Alex Kaeslin left Switzerland in 2003 to come to Australia after working many years for a Swiss Bank. He travelled extensively throughout the country before settling in Melbourne to study for the Diploma of Arts Applied Photography at the International College of Creative Arts (ICPP), previously known as the International College of Professional Photography.

After graduating in 2005, he decided to focus on his career goal of combining his passion for photography with a love of nature and interest in social and environmental issues.

After years of planning and preparation this promising young photographer and his best friend, Albano Tundo, left Darwin, Australia in June 2006 and headed to the Tanimbar Islands, Indonesia by boat to start their journey, bikes laden with all of their equipment and worldly possessions for the next two years.

Now, three months into their journey, the boys have ridden across Indonesia from Yamdena to Jakarta and after a whirlwind tour of Sumatra this month they will be heading to Malaysia in early October to tackle mainland South East Asia.

The adventure is being documented for the world to share and promises to result in incredible images from all over the world in both still photography and film.

You can share in the adventure online (www.alexkaeslin.com) with regularly updated photos and stories from the road and even subscribe to the newsletter for a more in-depth glimpse of life on two wheels – the boys would love you to be a part of this trip!

Alex is dedicating this journey to his late father, Willy Kaeslin, "Without his love and support this trip would still just be a dream."
